

Quality of Care Evaluation Form

The Saskatchewan College of Midwives requires that Registered Midwives in Saskatchewan hand out evaluation forms to all clients in their care. This allows midwives the opportunity to reflect on the care they give, learn what has been done well and where there is room for improvement. Please complete this form and return it to the midwifery practice where you received care. Thanks!

PRENATAL CARE	Agree	Disagree	Not Applicable
I was given information during my prenatal visits that allowed me to make informed decisions about my care.			
I was given opportunity to discuss choice of birthplace (i.e. hospital or out of hospital).			
There were adequate opportunities for me to meet the midwives involved in my care.			
I understood how to reach the midwife on call for an emergency or labour.			
I understood why I was referred to an obstetrician or other specialist during my pregnancy.			

LABOUR/BIRTH CARE	Agree	Disagree	Not Applicable
I was given information and opportunity to make informed decisions during my labour and birth.			
My midwife and nurses worked well as a team. OR My midwives worked well as a team.			
I understood why an obstetrician (or other specialist) was consulted during my labour/birth.			

POSTPARTUM CARE	Agree	Disagree	Not Applicable
I was given information during my prenatal visits that allowed me to make informed decisions about my care.			
I appreciated the combination of home and clinic visits.			
I was given information on how to care for myself and my newborn.			

MIDWIFERY CARE	Agree	Disagree
I felt that the decisions I made regarding my care were respected by the midwife/midwives.		
I appreciated having one team of care providers for the entirety of my care, from pregnancy through to postpartum.		
I felt confident in my midwife/midwives' skills overall.		
It was easy to contact my midwife/midwives with urgent (i.e. labour) and non-urgent questions or concerns.		
I would recommend midwifery care to someone else.		

What did you like most about being cared for by a midwife?

Is there anything you wish would have been different with your care?
